

Syria Conflict

2022

Overview

The severe and complex conflict crisis in Syria has left over half the population in need of humanitarian assistance. In 2022, the ETC continues to enable the humanitarian response by providing shared security communications and data connectivity services to facilitate the entire humanitarian response and support the safety and security of staff.

ETC services provided in **8 COMMON OPERATIONAL AREAS**

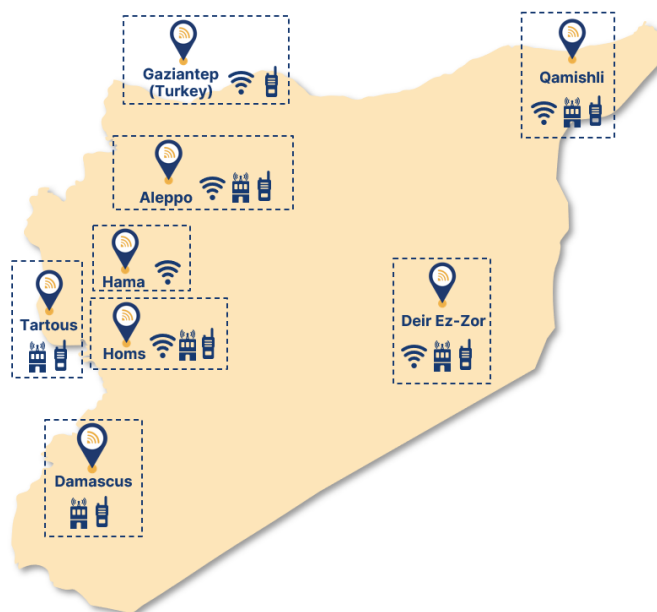

100% FUNDED out of the required **US\$550,000** in 2022

6 UNDSS SECURITY OPERATION CENTRES (SOC) supported by the ETC

ETC was activated in **JANUARY 2013**

Communications for the response community

ETC communications services are provided across eight common humanitarian areas – Aleppo, Damascus, Deir Ez-Zor, Hama, Homs, Tartous, Qamishli, and Gaziantep in Turkey. These communication services enable responders to work, stay safe in the field and communicate with colleagues.

Data connectivity — Across five common operational areas— Aleppo, Deir Ez-Zor, Homs, Qamishli and Gaziantep—as well as the field office in Hama, the ETC provides connectivity services to 350 humanitarian workers from 11 UN agencies to enable the humanitarian response.

Security communications — The cluster also provides security communications (radio) services to 660 humanitarians such as radio programming, training, and support to the six UNDSS-managed Security Operations Centres (SOC) located in Aleppo, Damascus, Deir Ez-Zor, Homs, Tartous and Qamishli, to ensure staff in the field can communicate safely and securely.

User support, coordination and information management — An ETC helpdesk is maintained to support the response community. The ETC also provides coordination of ICT activities based in Damascus, and shares operational information to support decision-making.

ETC objectives in 2022

In 2022, the ETC will continue to support humanitarians with effective communications services. The cluster will:

- Enhance the coverage of VHF radio networks in common operational areas.
- Upgrade communications infrastructure in five humanitarian hubs – Aleppo, Deir Ez-Zor, Homs, Tartous and Qamishli.
- Deploy back-up solar power to support connectivity services in Deir Ez-Zor and Qamishli.
- Provide ICT helpdesk support in the inter-agency response areas in Syria and Gaziantep in Turkey.
- Develop the technical capacity of national humanitarian ICT staff through the delivery of two training courses on IT emergency management and technical security communications.
- Support new common operational areas and extend common services as required.

Partner and donor organizations supporting the ETC in Syria: OCHA, UNDSS, UNHCR, UNICEF, WFP, USAID/BHA
