ETC Capacity Building

Introduction

Embark on a journey of professional growth with the Emergency Telecommunications Cluster (ETC). Our dynamic guides offer access to tailored learning paths for three technical and four non-technical profiles designed to enhance your skills and advance your career in emergency telecommunications.

Each section contains a description of respective profiles and access to a learning pathway housed in MS Excel. You can interact with each learning pathway by filtering on the competency level, deliverable name and/or the topic in which your interest lies.

You can scroll left and right to reveal all topics within the spreadsheets. For any recommended inclusions please contact:
etc.training@wfp.org

Technical Learning paths

Do you want to dive into the world of information technology and networking?

IT / Networking Specialist

Click above and follow this path to find out how to learn to design, implement, and maintain robust IT solutions crucial for emergency operations.
